Mobile: +91-9653874118

Email: narnoliaaman07@gmail.com

GitHub: <https://github.com/aman-narnolia>

SKILLS

Languages: JavaScript, Python, C, C ++

- **Technologies:** HTML, CSS
- **Databases/Tools:** MySQL, MongoDB, Git, GitHub, Figma
- **Soft Skills:** Problem solving, Team collaboration, Time management, Adaptability

PROJECTS

Helping Connect — Social Support & Donation Platform

| [GitHub](#)

- **The Core Problem:** Lack of a centralized system causes delays, mistrust, and inefficient distribution of help.
- **The Solution:** Connects needy individuals, donors, and verified NGOs to coordinate requests, donations, and help delivery.
- **Key Features & Mechanics:**
 - **Multi-Role System:** Separate workflows for Needy Users, Donors, and NGOs.
 - **Request & Donation Workflows:** Enables users to request help or offer resources through NGOs.
 - **NGO Verification & Broadcasts:** Builds trust and connects resources with genuine requests.
 - **Real-Time Coordination:** Socket.IO chat and broadcast notifications enable faster communication.
 - **Proof & Ratings:** Uploads and ratings improve transparency and accountability.
- **Domain:** Full-Stack Web Development / Social Impact
- **Tech Stack:** React, Tailwind CSS, Node.js, Express, PostgreSQL, Prisma, Socket.IO.

Real-Time Noise & Air Quality Detection and Hotspot Mapping

- **The Core Problem:** Traditional pollution monitoring systems are often expensive, stationary, and provide delayed environmental data.
- **The Solution:** Developed a low-cost IoT system that simultaneously monitors air quality and noise levels, displays live readings locally, and streams data to the cloud for hotspot analysis.
- **Key Features & Mechanics:**
 - **Dual-Parameter Sensing:** MQ-2/MQ-135 and KY-037 sensors monitor air quality and noise levels in real time.
 - **Real-Time Display:** I2C LCD shows live air-quality, noise, and Wi-Fi status.
 - **Cloud Monitoring:** ESP8266 sends telemetry to ThingSpeak using HTTP GET requests.
 - **Hotspot Mapping:** Identifies areas with continuous high noise and pollution exposure.
- **Domain:** IoT Environmental Monitoring / Embedded Systems.
- **Tech Stack:** Arduino Uno, Embedded C/C++, ESP8266, MQ-2/MQ-135, KY-037, I2C LCD, ThingSpeak.

CERTIFICATES AND ACHIEVEMENTS

- Introduction to Artificial Intelligence | [Infosys](#) March 2026
- Programming Fundamentals using Python - Part 1 | [Infosys](#) July 2026
- Programming Fundamentals using Python - Part 2 | [Infosys](#) July 2026
- 'WEB-A-THON 2.0' organised at LPU | [Certificate](#)
- 'Ai-Fusion' Hackathon at IIT Ropar | [Certificate](#)
- 'Almagination' hackathon at IIT Ropar | [Certificate](#)

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.44** Aug 2025 - Present
- **Vinayak Convent Senior Secondary School** Sikar, Rajasthan
Higher Secondary Education 2024
- **Vinayak Convent Senior Secondary School** Sikar, Rajasthan
Secondary Education
